

Smart Fleet Management for Transport Companies

Mapon value for you in key areas

Ensure compliance

Automate tachograph downloads and centralise documentation to avoid fines and meet EU regulations effortlessly.

Keep the fleet safe

From real-time alerts to incident prevention tools, everything is designed to help you avoid accidents, reduce insurance costs and keep operations running smoothly.

Make data-based savings

Monitor fuel consumption, idle time, vehicle usage and CO₂ emissions. Use real-time dashboards to make smart, cost-saving decisions.

Manage drivers effectively

Assign routes and tasks, collect digital forms and vehicle inspections, and receive real-time updates — all in one centralised platform that simplifies daily operations.

Facing these issues?

- 1 Large fines** due to lack of tachograph and toll road compliance, missing sustainability reporting
- 2 Inefficient fuel consumption** due to fuel theft and negative driving practices
- 3 Lower fleet efficiency** due to unfiltered raw data, complex employee management, and lack of transparency and accountability
- 4 Increased maintenance** due to negative driving practices, property damage, and careless or drunk driving accidents

Mapon solutions can help!

- ✓ Remote tachograph data downloads and analysis
- ✓ Task management and route planning*
- ✓ Cargo temperature monitoring
- ✓ Toll road integrations
- ✓ Driving behaviour analysis
- ✓ Trailer connection reports
- ✓ Camera systems

Our clients save time & money

From 2-3 days to collect tachograph data to **20 minutes**

Decreasing fuel consumption by **2 litres per 100 km** per driver

Camera footage saves up to **€5,000 per case**

Protect your fleet, reduce costs, and gain complete control over your vehicles with Mapon fleet management!
